COMBICOLOR® METAL 7300/7400

DESCRIPTION

RUST-OLEUM® CombiColor Metal 7300/7400 coating is primer and topcoat in one, based on a urethane modified alkyd, providing good drying properties at low temperatures. The product contains rust-inhibitive pigments and is lead- and chromate free.

RECOMMENDED USES

RUST-OLEUM CombiColor Metal 7300/7400 should be applied on bare, manually derusted or with CombiPrimer Anti-Corrosion 3369/3380 primed steel. CombiColor Metal is intended for brush and roller application and can also be applied by air spray.

RUST-OLEUM CombiColor Metal 7300/7400 offers corrosion protection in a light industrial environment.

For metal structures in a more aggressive industrial environment, prior application of a RUST-OLEUM CombiPrimer Anti-Corrosion 3369/3380 is recommended.

Coverage

Heat resistance:

Theoretical: 10.3 m²/l at 55 µm dry, depending on colour.

Practical: Practical coverage depends on many factors such as porosity and

roughness of the substrate and material losses during application.

90°C (dry heat), at elevated temperatures discoloration may occur.

SURFACE PREPARATION

Remove oil, grease and all other surface contaminations by alkaline or high pressure (steam) cleaning in combination with appropriate detergents. Remove rust scale, loose mill scale, loose rust and loose coatings by scraping and wire brushing to St 3 (ISO 8501-1: 1988), light blast cleaning or sanding. Sand intact coatings to roughen the surface slightly.

The surface must be clean and dry during application. Galvanised, Zinc and Aluminium surfaces have to be primed first with CombiPrimer Tack Coat 3302.
