## **8.2. Exposure controls**

### **8.2.1 Appropriate Engineering Controls**

#### **Engineering controls**

Ensure adequate ventilation, especially in confined areas  
Provide local exhaust ventilation  
In case of insufficient ventilation, wear suitable respiratory equipment  
Do not breathe dust

### **8.2.2 Individual protection measures, such as personal protective equipment**

#### **Eye/Face Protection**

Wear safety glasses with side shields (or goggles)

#### **Skin and Body Protection**

Wear suitable protective clothing  
Care should be taken in the selection of protective clothing to ensure that inflammation and irritation of the skin at neck and wrists through contact with the powder are avoided

#### **Hand protection**

There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals  
Ensure that the breakthrough time of the glove material is not exceeded. Refer to glove supplier for information on breakthrough time for specific gloves  
The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed  
Gloves should be replaced regularly and if there is any sign of damage to the glove material  
Always ensure that gloves are free from defects and that they are stored and used correctly  
The performance or effectiveness of the glove may be reduced by physical / chemical damage and poor maintenance

Wear protective gloves
